

## CARING FOR YOUR iSi EXTREME DUTY BICYCLE CARRIER

***Congratulations on your purchase of the iSi Extreme Duty Bicycle Carrier.***

With a few easy steps you can keep your carrier operating well and looking great for many years to come.

### 1. GIVE YOUR PIVOT PINS SOME LOVE

The pivot pins are a vital part of the carrier and with regular applications of a light smear of grease, will slide in and out easily and resist corrosion and wear. The ideal grease is a high quality copper based assembly lube.

**Product suggestion:** *Molytec Copatec Anti-Seize Lubricant*

### 2. GREASE YOUR SCREWS

A light application of high quality copper based assembly lube will keep the screws operating easily and allow them to reach the desired tightness by hand. Grease also aids in keeping thread wear to a minimum so apply regularly and wipe off excess.

**Product suggestion:** *Molytec Copatec Anti-Seize Lubricant*

### 3. KEEP YOUR BICYCLE CARRIER CLEAN

Your bicycle carrier is manufactured from the highest quality Australian Steel that has then been powder coated with an extremely high UV resistant polymer coating. Regular washing with car washing detergent that contains wax is the best - particularly after the carrier has been operating in dusty or salty environments.

**Product suggestion:** *Meguiars Ultimate Wash And Wax*

### 4. CLEAN RUBBER

The frame support cradles are lined with a special ultra-high UV resistant closed cell rubber compound with a very wide contact patch that is designed to become slightly tacky with vibration. This protects fragile carbon bicycle frames under the harshest off-road operating conditions. Wash regularly using a mild dish washing detergent with cold water and rinse thoroughly.

## 5. TOUCH UP NICKS

Your bicycle carrier is a rugged piece of 4WD equipment so there's no avoiding the fact that it gets knocked and scratched. A black touch-up pen is perfect to dab a spot of paint over any damaged powder coat to inhibit corrosion and keep your carrier look great. For larger areas of surface damage, a high quality satin black spray can will be your best friend.

**Product suggestion:** *Diagraph GP-X Classic Valve Action Industrial Paint Marker Black or VHT Epoxy Satin Black Self Priming All Weather Paint*

## 6. LATCH CONTACT POINTS

The PoziLock is an over-centre latch that grips the upper pivot sleeve tightly and it is entirely normal for the contact point to be marked. Touch up with a paint pen from time to time. It is not unusual for the latch to pull the upper pin tight when new. The whole pivot assembly has six points of alignment, which requires a bit of travel under load for the pivot assembly to bed in.

**Product suggestion:** *Diagraph GP-X Classic Valve Action Industrial Paint Marker Black*

## 7. STRIKER PLATE

The StrongArm support post Striker Plate adds additional support to the loaded carrier and it is entirely normal for the contact areas on the plate and lower pivot sleeve to be marked. Every now and then pivot the carrier up and touch up with a paint pen or spray paint.

**Product suggestion:** *Diagraph GP-X Classic Valve Action Industrial Paint Marker Black or VHT Epoxy Satin Black Self Priming All Weather Paint*

## 8. WATER POOLING

Keep an eye out for evidence of water pooling on any part of the carrier - particularly if the carrier has been operated in salty or coastal environments. If you see regular evidence of pooling, then clean and give the area a quick spray of high quality satin black paint to deliver further protection against corrosion.

**Product suggestion:** *VHT Epoxy Satin Black Self Priming All Weather Paint*

## 9. KEEP IT FRESH

One of the key benefits of the iSi bicycle carrier is that it's all steel so that every few years of operation under harsh conditions, it's dead easy to book it in for a freshen up. Powder coating businesses all around the world offer this service. It's low cost and very effective to keep it all looking fresh.

## 10. WARRANTY

All iSi Bicycle Carriers products are supported by a 12-month coating and finishes warranty and a lifetime warranty for everything else. Our customers rely upon our products to stand up to the harshest conditions in some of the most remote parts of the planet. If something breaks anywhere in the world, we replace it! No questions asked.

**Wherever you are in the world, the iSi support team is always on hand to assist our fellow adventurers.**
